

Surf, work, or play without running wires

The Internet is yours, all around your home. Enjoy surfing, searching, communicating, and playing, wherever you want. The Wireless-G Home Router with SpeedBurst is great for sharing an Internet connection and connecting all of your computers to each other – without running wires.

The Freedom of Wireless

Wireless-G technology creates a fast wireless connection for several computers at once. This easy-to-set-up wireless network lets you access your broadband Internet connection to surf the Web and send email – or connect between computers to share music, photos and other files, or print to your printer. All without wires, from all around your home.

Device Connectivity

Keep your digital photos or music in one place; share them from any computer on your network. Four built-in 10/100 Ethernet ports make it easy to connect additional wired computers, storage devices, printers, and other wired devices to your network so you can access them from your wireless-enabled computers.

Security Made Simple

Wireless security and firewall protection designed to help safeguard your home network and computers from most Internet attacks.

The maximum performance for wireless is derived from IEEE Standard 802.11 specifications. Actual performance can vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends on many factors, conditions and variables, including distance from the access point, volume of network traffic, building materials and construction, operating system used, mix of wireless products used, interference and other adverse conditions.
